

TikiLIVE Releases Set Top Box with ATSC Tuner for Local Channels *Over-The-Top (OTT) Provider gives alternative HDTV delivery for free*

MARATHON, FL (Date) – TikiLIVE, the leading OTT (Over-the-Top) platform developer and internet hosting company, has found an easy and cost-effective way to deliver value to subscribers and the clients of its white label service providers. The new white label STB with ATSC Tuner for Local Channels from TikiLIVE combines OTT content with local programming in one easy to use interface.

“Adding the ATSC Tuner card will pull in the full local channel lineup from your area and allow you a free alternative to watch HD television,” said Tim Green, Founder of TikiLIVE. “We have just expanded our HD lineups by over 100 channels in some markets without adding any fees to our end users. We love delivering free HD TV”

TikiLIVE’s service offers live local HD channels such as ABC, NBC, FOX, CW, CBS delivered with our live OTT HD channels, live streaming music and a vast selection of video on demand (VOD) libraries. There are no long-term contracts – all content subscriptions run month to month, so there is no need to worry about credit checks, getting stuck with a bill for services no longer in use or crazy cancellation fees.

The new “white label” STB is simple to set up and configure with no need to schedule an installation and worry about when the service professional will show up. It’s as easy as connecting the box to the power source, HDMI cable, and the included ATSC antenna, then following easy interface instructions on how to connect either your Wi-Fi or Ethernet setup.

About TikiLIVE
